EXCLUSIVE INVITATION

Strategic matchmaking in the Baltics

We have a great belief in the development of the Baltic Region in a global context. Today many businesses are born global and cross border cooperation are not only an option but in many case a must. Technology opens for new possibilities and opportunities but in times of digitalization personal relations and networks are increasingly important.

That is why we together organize a matchmaking event in connection with Innovation Day.

INNOVATION DAY 2020/05/07

For the fourth year running, Innovation Days invites companies, start-ups, academics and public sector to both discuss and experience the digital future. Innovation Day is arranged by Blue Science Park - a collaboration between industry, Blekinge University of Technology, Karlskrona Municipality and Blekinge County Council.

More about Innovation Day 2020

Establish contacts, find partners and develop business in the field of Digital, eHealth and Maritime Technology. May 7th and 8th we invite you to meet your peers in real and find new collaboration opportunities through one-to-one match making appointments.

The matchmakeing process identifies fields of innovation and business interests and conntects potential partners. The role as “brokers” in a pre matchmaking process rests on the well-established cooperation between Science parks and municipalities in the Baltic region. People with strong local networks and knowledge of the companies discuss and find best suitable match for you.

The matchmaking event is a part of Innovation Day 2020 arranged by Blue Science Park.

Join us in Karlskrona, Sweden on the 7th and 8th of May 2020.
